

CS 461 - ARTIFICIAL INTELLIGENCE

Rubric for Demo #2

(5% or 10 pts)

Fri 20 Dec, 2019

1st session: 10:40-12:30; 2nd session: 15:40-17:30

Group nick:

EARLY WORK

- If there is a discrepancy---however small---in the display of puzzle geometry or clue texts or clue numbers in puzzle cells, 1 point per discrepancy will be deducted from your grade for this demo. (Puzzle cells should be perfect squares.)
- If the solution is not directly displayed, 2 points will be deducted from your grade for this demo. (Hence, avoid a reveal button.)
- If today's date and the nick name of your group are not shown, 2 points will be deducted from your grade for this demo.

NEW WORK

- After downloading today's puzzle in real time in front of me (as in Demo #1), your program will generate the new (modified) clues and display them in a reasonable fashion---e.g., next to (or under) the original clues---so that I can easily compare them.
- You should have a "trace" window open at all times which shows in sufficient detail the activities of your program (i.e., web, graphics, and more importantly, AI activities).

Groups will be called in the same order with Demo #1. Having just a single member present for the demo is fine. I'll send you a schedule separately.

Once the demo is over, take a screenshot and slide it under my office door (EA 503) by 6 p.m. Do not leave it in my mailbox in the department (this being a Friday). Make sure that everything fits into a single page.

TODAY'S PUZZLE

of acceptably good (viz. sufficiently modified) new clues:

(If everything goes well, this number will simply be your grade from this demo.)

() program trace not sufficiently detailed (-2 points)

() screenshot late or not submitted (-7 points)
